

SERVICES

Gain a valuable resource to enhance your in-house IT team.

TERACAI's engineers supplement your projects by filling any potential gaps in **time, knowledge, technology, or staffing.**

Our engineers have extensive experience in providing customized solutions to organizations of all sizes and hold numerous manufacturer certifications. We continually expand our knowledge base to better understand the technologies you use now and prepare for the ones you'll implement in the future.

Life Cycle Management

Make smart investments throughout your IT life cycle.

At TERACAI, we help you find the right technology for you – then use it as a competitive advantage in your field.

The goal is to discover creative ways for you to make wise investments at every step of your journey – maximizing value and the efficiency of your technology infrastructure.

Minimize CAPEX and lower OPEX with customized solutions

Have choices on how to invest your technology budget

Reduce your reliance on OEM offerings

Customize blended solutions specific to your needs

Make your job simpler and free up time and budget

IT Asset Disposition

Maximize value and protect your data.

When the time comes to retire your technology assets, there's only one method that makes the most sense.

You need to find a partner who will offer you maximum value and protect your sensitive data.

We offer the highest value for your surplus networking, server, storage, voice and other technology equipment.

Professional Services

We diagnose, train and deliver extensive support.

Our team is responsive and knowledgeable - not just because of the extensive certifications and specializations we hold, but because of real-world, in-the-trenches global IT experience with customers just like you.

- Project Methodology
- Installation
- Staging and Configuration
- Project Management
